DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group 1. Claims 17-19, drawn to a PS118 polypeptide of SEQ ID NO:27, or fragments thereof comprising SEQ ID Nos: 28-31, classified in class 530, subclass 350.

Group 2. Claims 21-22, 36-37 drawn to a assay kit comprising a PS118 polypeptide of SEQ ID NO:27, or fragments thereof comprising SEQ ID Nos: 28-31, classified in class 530, subclass 350.

Group 3. Claim 20, drawn to an antibody which specific binds to at least one PS118 epitope of the amino acid sequence of SEQ ID NO:27 or fragments thereof comprising SEQ ID Nos: 28-31, classified in class 530, subclass 387.1.

Group 4. Claims 23-24, drawn to a kit comprising an antibody which specific binds to at least one PS118 epitope of the amino acid sequence of SEQ ID NO:27 or fragments thereof comprising SEQ ID Nos: 28-31, classified in class 530, subclass 387.1.

In addition, upon election of any of groups 1-4, further election of the following patentably distinct species is required:

Full length sequence of SEQ ID NO:27 or fragments thereof, comprising SEQ ID Nos:28-31.

Upon election of the species fragments, further election of the following patentably distinct species is required:

Any one of SEQ ID Nos:28-31.

Art Unit: 1642

The inventions are distinct, each from each other because of the following reasons:

The products of groups 1-4 are patentably distinct, because they are drawn to entirely different biochemicals, having different structures, and biological properties. Further, the polypeptide or antibody composition and a kit are distinct because the kit comprises extra compounds not found in the composition claims.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art, and because the searches for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicants are required under 35 USC 121 to elect a single disclosed group for prosecution on the merits to which the claims shall be restricted. Applicant is further advised that if Applicant elects a group having species requirement, a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 1642

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH-TAM DAVIS whose telephone number is 703-305-2008. The examiner can normally be reached on 9:30AM-4:00PM.
